

I enjoy XM radio very much and it fits our needs, especially when we travel to see our grand children. I'm sure many trucker are enjoying XM radio as they cross the United States. I see it as Progress. Things will always get better! Its the American way. We, as americans will always look for the better mouse trap, then make it better! I feel sorry for those factions that would stifiel creativity for a few dollars. If they had their way we would be watching Black & White TV and Bennie & Cecil. Let America grow! Embrace growth and technology. Look to the horizon. THE EARTH IS NOT FLAT....trust me!

Its this type of liberty myself and the troops in Iraq are fighting for. The advertisers should find an inovative way to utilize this new medium.
